Ozone and Plant Ecosystems Conference

Organized by MOTTLES in collaboration with ICP-vegetation and IUFRO (RG7.01.00)

Sant'Apollonia, Firenze, Italy

Following the success of the conference Ozone and Plants held in Beijing in May 2014, we are pleased to announce this follow-up conference.

Ozone pollution continues to be a serious issue for terrestrial ecosystems and plant health. Progress has been achieved by controlling the emission of precursors in some areas of the world, but much remains to be done. This conference will allow all experts in the interactions between ozone and plant ecosystems to meet and discuss the state of the art and the strategies for continuous improvements.

18-21 September, 2018

"Forest Science for a Sustainable Forestry and Human Wellbeing in a Changing World"

INCDS "Marin Drăcea" 85 Years of Activity, Centenary of The Great Union in 1918

Chamber of Commerce and Industry of Romania, Bucharest, Romania

The International Scientific Conference "Forest Science for a Sustainable Forestry and Human Wellbeing in a Changing World – INCDS "Marin Drăcea" 85 Years of Activity, Centenary of The Great Union in 1918" is an open scientific event dedicated to the anniversary of 85 years of activity in forestry research of the National Institute for Research and Development in Forestry "Marin Drăcea".

In 2018 this great anniversary event coincides with the celebration of 100 years since the Great Union of the Romanian historical provinces.

The conference is focused on forest research, with a large range of topics, including: the impacts of air pollution, climate change, biotic and abiotic stressors on forest resources status, adaptive management, modelling and mapping of forest ecosystems and their services, genetics, protected areas, ecological connectivity, new Earth-Observation technologies applied in forestry.

The International Conference will include a special session organized by the MOTTLES project.

You can find more information about registration and sessions here.
